DETAILED ACTION

Allowable Subject Matter

1. Claims 11-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: regarding independent claims 11 and 14, the prior art does not disclose nor suggest a short circuit detector having a digital control circuit for propagating a digital signal over a network with first and second high impedance semiconductor circuits coupled between positive and negative leads and the shield conductor with outputs that activate an alarm to indicate that a short circuit exists between either of the positive and negative leads and the shield conductor. Hiller discloses a similar device that detects faults in a multi-cable system and a shield conductor, however Hiller teaches away from the claimed invention by using analog AC power and detection circuitry that is based on the multiple phases of the AC power.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
